Section# 09

Problem Statement:

Nowadays many of the people of world is suffering from Covid-19 also as Bangladesh is a over populated country. Blood is an important aspect for all living things. It proves to be a lifesaving component in case of emergency requirement. In this users can view all the information provided. The main aim of developing this application is to reduce the time to a great extend that is spent in searching for the right

donor and the availability of blood required. As well as User can register himself for his/her organ donation after his/her death to the needed ones.

Project Goal:
This project has some specific goals such as to improve Organ Donation system in online.
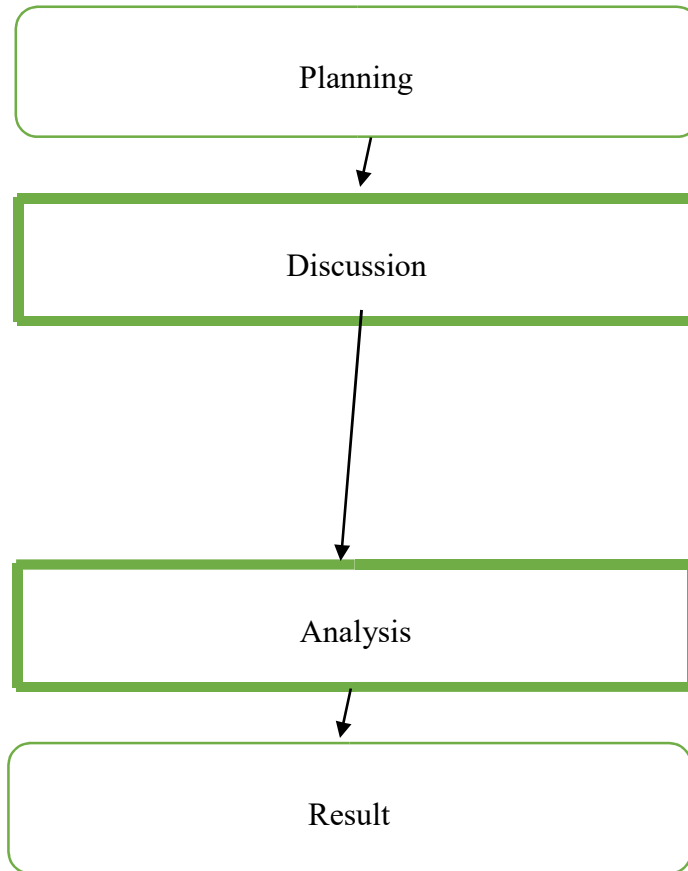

Plan and Design:
User
    Search organ
    See available organ
    Book organ
Admin
    Delete, add and edit organ

Working Diagram:
